Tips for Using the Template

1. **Be Specific:** The more details you add, the closer the AI gets to your vision. Mention textures, lighting, or even character expressions if relevant.

2. **Experiment:** Swap out elements (e.g., "rainy atmosphere" instead of "twilight tones") to match your mood.

3. **Tool Compatibility:** Works with ChatGPT (upload + prompt), Grok (multi-image prompts), or OpenArt (text-to-image or image-to-image).

4. **Refine Results:** If the output isn't perfect, tweak the prompt—e.g., "add more detail to the background" or "soften the colors."

Bonus Prompt Variations
